

# Fundamentals of Magento 2 Development

## *Unit 3.5 Exercise Solutions*

**You will be provided with a code archive containing the solutions for the exercises in this unit.**

### **Reinforcement Exercise 3.5-2-1**

1. Create an extension which will print into the console a number of shown attributes in the "More Information" tab on the product details page.
2. Create an extension that alerts the full action name on every page.

### **Reinforcement Exercise 3.5-3-1**

Dump the data passed to the customer form. (Print the data array into the file.)

### **Reinforcement Exercise 3.5-4-1**

Create an extension that writes "Hello World" at the top of a mini-cart popup.
